PROJECTS

Tathyadarpan

June 2020 – Present

This project divided into two module:

1. User Module: Anyone can read the news and also search for particular news. The reader can leave comments on the particular news.

2. Admin Module:

Admin login system and **Admin dashboard** ->Category – In this section admin can add/update/delete the category. Admin can also restore deleted category.

Sub- Category – In this section admin can add/update/delete the Subcategory. Admin can also restore deleted Subcategory.

Scientific Calculator

Feb 2020 – April 2020

This scientific calculator project is in Python.

Talking about the features of this system, this python application is designed to calculate entered numbers to any operations and it is also capable of handling all types of exceptions. Also, the design of this system is pretty simple so that the user won't get any difficulty while working on it.

Using Tkinter and Python functions

Hotel Management System

Oct 2019 – Nov 2019

Hotel Management Information System has been developed in PHP to keep track of hotel guests.

It has facilities for booking, making registrations and posting of bills and entering room hotel rates.

It also has a web interface with access options for selected users.
